

The **Internal Medicine** division of **Lee's Summit Physicians Group, Inc. (LSPG)** is growing its practice! We are looking for a board-certified (or board-eligible) Internal Medicine, Family Practice physician or Geriatrician to add to our current providers. We are an independent practice, 100% owned by the providers. Our practice is located in a thriving suburban setting of 100,000+ residents, in very close proximity to several progressive medical centers, qualified specialists, retirement communities and academic facilities.

Salary is guaranteed for the first 2 years with production bonuses after the first. You may choose between working 4, 4 1/2 or 5 days a week. Because we are an independent/physician-owned practice, full partnership opportunities are available. Starting salary is competitive and dependent on your choice of work schedule.

Our practitioners enjoy the best clinical experience found in the Midwest, serving a patient population of working adults ages 14-100+. Providers take their own call M-Th and weekend call is 1:5. The clinic is open M-F only with office visits starting at 8-8:30am and the last appointment of the day is between 3:30- 4:20. Because we are small and independent we have a great deal of flexibility in our schedules which allows you significantly more freedom compared to working for a large hospital group. The practice utilizes hospitalists for inpatient care coverage, and our doctors currently have zero to minimal nursing home involvement. However, the extent of your nursing home presence is up to you.

LSPG's physical facility offers ample space--parking, reception, waiting area and exam rooms--and allows patients the convenience of a variety of in-office services, including phlebotomy, waived laboratory testing, breathing treatments and EKG's. The group's fully-implemented EMR system allows for an efficient approach to patient care, and we have a well-established administrative and clinical support staff which includes staff specifically devoted to care coordination. In fact, our practice has earned the NCQA's Level 3 certification for patient-centered, coordinated medical care.

LSPG offers an excellent compensation and benefit package which includes: malpractice insurance, state and federal licenses, hospital dues, continuing medical education, 3-weeks paid vacation, short and long-term disability coverage, retirement plan, health and dental insurance. Partnership opportunities are available for the right individual.

At LSPG we care for families. Because we are independent you will be allowed to spend the time to care for the whole patient – not just their immediate needs. Do you miss the reason you chose medicine? Do you have burnout in your current position? If so, LSPG is for you.
